

The Centre on Conflict, Development and Peacebuilding (CCDP), in collaboration with the Europe-Third World Centre (CETIM) and the Centre for Research Architecture, has the pleasure of inviting you to a public lecture on:

# Forensic Architecture

## The Testimony of the Rubble from Gaza

By **Eyal WEIZMANN**, Architect and writer, Director of the Centre for Research Architecture, Goldsmiths College, University of London

The lecture will delve into the interfaces between conflict, the urban and the laws of war. As the rubble of 15,000 destroyed and damaged buildings is still scattered through the streets and camps of Gaza, the battle of forensics has begun: who can speak in the name of this rubble? What new reality can emerge in its stead? Has the chaos, death and destruction been actually instigated with the terrible force of the law?

The conference will be moderated by **Prof. Riccardo BOCCO**, IHEID.

Date: **10 June 2010**  
Time: **6:30 pm**  
Location: **Auditorium Jacques Freymond (AJF)**  
IHEID - 132 rue de Lausanne, 1202 Geneva)
